OMV Case Study

Name: **Jack Franklin**
Job Title: **SR Planning Consultant**
Company: **Self Employed – Main contract OMV**
Industry: **Oil & Gas**

The problem – What was the main reason to choose ScheduleReader?

To easily and quickly review the integrity of the schedule when time constraints or other priorities do not allow for a detailed review.

The solution - How did ScheduleReader help you?

With one button I can review the DCMA 14 point assessment which tells me if it is worthwhile reviewing a schedule in further detail or not.

The outcome - What did you improve (results)?

Time savings, quicker turnover of schedule feedback and I do not have to waste time reviewing a schedule that is not ready.

Comments/Improvement suggestions:

Print function for the schedule reader DCMA 14 point page is slightly blurry when exported to PDF. Would also be good to show different graphics for this.
