

Customer Case Study

Name: **Bill Prokopowich**
Job title: **President**
Company: **PCPM Construction Management**
Industry: **Construction**

The problem – What was the main reason to choose ScheduleReader?

Schedule analysis is a critical part of our company's portfolio. We review over a dozen projects monthly ranging in size from \$8M to over \$200M for the cost of construction. The complexity of the projects for the most part are new build hospitals, and some are renovations with a new addition. Time is a very important factor for the clients to know when they will be able to move into the new facility. And the transition from old to new take months of planning. We needed a program that was user friendly for our staff and quick to get the answers.

The solution - How did ScheduleReader help you?

As mentioned above we needed a program that was quick, not cumbersome and easy to use. ScheduleReader is a very useful tool but somewhat cost prohibitive, and very large. We needed a program that we could take to the jobsite and review and update the status and have the results by the time we return to the office for a meeting with the stakeholders that's where ScheduleReader out performs all competitors.

The outcome - What did you improve (results)?

The schedules from ScheduleReader were simple to view for the stakeholders, as often we had to put it on an overhead projector for all to see and we could move about in the program quickly and this showed them where the project was headed.

Comments/Improvement suggestions:

We are very pleased with the ScheduleReader as it has added the flexibility for project reviews and with the new update in V4.02 this enables us to present the findings in a more detailed presentation.

GENERAL USE CASE

Without ScheduleReader

Ineffective flow with many limitations that increases the project risks

Project Scheduler

using Oracle® Primavera® P6®

Spend time resource on:

- Exporting plans in PDF
- Adjusting views per team
- Ineffective communication

Share the project schedule in **PDF** or XLS format.

This file format contains limited data and no calendar details.

PM, TL, Members, Superintendents, Contractors

non Primavera® P6® users

Users have limitations:

- Can't organize their personal views
- Can't filter and group relevant data
- Can't compare baselines

ScheduleReader™

Complete view, insights and understandings that maximizes productivity

Project Scheduler

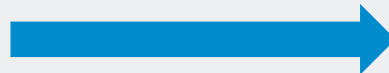

using Oracle® Primavera® P6®

Save time on:

- Automate file sharing
- Use custom layouts
- Quick progress updates

Project schedule is shared in **.XER** native format.

This file format contains rich activity insights as in the original P6® schedule.

PM, TL, Members, Superintendents, Contractors

using ScheduleReader

Users have advantages:

- Intuitive and dynamic views
- Quickly filter and group data
- Compare project baselines
- Propose progress updates

ScheduleReader™ is compatible with and can be used with Oracle® Primavera® P6®.

It is an independently developed reader product by I-Produkts® and it is not a product of Oracle®, nor is it endorsed, sponsored or affiliated with or by Oracle®. Oracle®, Primavera® and P6® are registered trademarks and brands of Oracle® Corporation and/or its affiliates.
